

Mercer Robotics Club October Newsletter

BattleBots Workshops

The next round of BattleBots, learning SolidWorks for chassis design, is ongoing. The next round of BattleBots, which involve advanced soldering and robotics programming in C++, will follow. Email us at mirlsecretary232@gmail.com to sign up.

Previous workshop attendance is **not** required to sign up for ongoing workshops.

Laser Cutter Certification

Anyone that has attended a BattleBots session only needs one more session to complete their certification. To schedule this session, both sessions if you did not attend BattleBots, or to renew your certification, email Spencer Penley at mirlpresident@gmail.com

BearsWithLasers Update

We now have notebooks as well as keychains and coasters. Order forms for notebooks are in SEB 232, and the website will be forthcoming.

Updates to Major Projects

The newest addition to our project list is a vacuum chamber. It's in need of some help to come back to life. If anyone would like to use it or help with bringing it back to life contact Art Hanner at mirlpresident@gmail.com
