

Mercer Robotics Club August Newsletter

BattleBots

Mercer BattleBots have arrived! We will be hosting several tournaments this year, as well as many free-play events. Come challenge your friends or our reigning champions. Build your own or play with ours. We can help you with kits. The final tournament will be held on Bear Day at our booth in the Engineering Expo. Follow us on Twitter at @Mercer_Robotics for locations and times.

New Fundraising

We are pursuing new products for fundraising in addition to the coasters and keychains. We will be sending updates throughout the semester. You can order products in the lab or online at bearswithlasers.org.

New Policies

Policies have been updated regarding the Coke Fund, laser cutter use, door codes, and funding for projects. Please visit the lab for more info and for door access forms.

Updates to Major Projects

The following projects need teams to begin work on them. Come see an officer if you would like to work on one or if you would like to head the team.

- ❖ Autonomous Kayak
- ❖ Autonomous Sub
- ❖ Mars Rover
- ❖ Universal Vehicle Operator

Quadcopter is headed by Daimen Estevez if you want to jump in!
